

Client:
USACE

KG's Role:
General Contractor

Location:
Richwoods, Missouri

Contract Value:
Undisclosed

Kolb Grading, LLC was chosen by the U.S. Army Corps of Engineers for this project. The project included features for moving and controlling water on the site, mast forest planting and access roads. Water control features include wells, a ramp for a portable pump, channels to move water throughout the site, and a gated structure to release water from the wetlands.

- Clearing; pond excavations
- Install rip rap along levee; access road construction
- Channel excavation; construct new well
- Seeding and tree planting
- Install new wells, remove old wells
- Install stop-log structures
