

Portage Des Sioux
October 21 2009

Client:
AMEREN

KG's Role:
General Contractor

Location:
West Alton, Missouri

Contract Value:
\$6 Million

Kolb Grading began providing services in maintaining the plant's fly ash pond in 2005. KG took the initiative to develop and implement a strategy to keep the plant operational and generate several hundred thousand cubic yards of fly ash used throughout the plant for various projects.

- Create a main haul road through the pond with bottom ash
- Installed pipes to allow water flow and level control
- Create deeper and wider channels; excavated fly ash dried and it's weight consolidated the underlying fly ash
- Excavated, dried, hauled and placed over 300,000 cy of dry fly ash from pond to fills
- Constructed a 53,000 ft haul road to support scrubber
- Improvements 600,000 cy excavated from fly ash pond
