Contract Value:
\$3.2 Million

Kolb Grading, LLC extended a four acre lake to a 90 acre lake and removed the old damn and installed a new one. Along the existing hillside we cut and blasted approximately 2.5 miles of roadway along the lake and throughout the project being cautious to leave the surrounding trees and vegetation as undisturbed as possible.

- Installed 48' arched pre-cast concrete bridge/spillway
- Blasted for boathouse and channel leading into lake
- Graded for 3 houses, pavilion and boat ramp
- Performed extensive dental work on existing rock face
- Added shot crete for stabilization
- Spillway construction
