

Client:
MK FERGUSON

KG's Role:
Subcontractor

Location:
Weldon Spring, Missouri

Contract Value:
Undisclosed

The Department of Energy's Weldon Spring Site became contaminated as a result of processing and disposal activities that took place from the 1940's through the 1960s. A 45 acre disposal facility was constructed to encapsulate contaminated waste from the site. Kolb Grading, LLC was awarded over eight contract in seven years at the Weldon Spring Superfund Site.

- Clearing and chipping
- Demolition
- Parking lot and haul road construction
- Bridge tunnels installed
- Linear Grading
- Contaminated material disposal
